

Pleasure, Passion, Challenge, Innovation

avantilles

Information and Communication Technologies

A consulting and engineering team for interactive 3D and innovative Virtual Reality applications on Internet and DVD.

You need :

- ❖ a 3D urban model,
- ❖ an interactive virtual art gallery,
- ❖ a driving simulator.

Interactive 3D models

Increase business efficiency with digital tools of communication and determination in architecture, tourism, transport, museums...

Animation films

Get full service HD/SD video production for documentaries, commercial, corporate, educational, and short films.

Computer Games

Offer all kinds of simulation models and captivating scenarios, which also emphasize pedagogy based on observation and logic.

« Serious games »

Provide multi-sensory education and training with realistic and compelling immersion in virtual environments.

We offer our products in all languages.
